**RE: Recommendation letter for Mary Marist**

Dear Hiring Committee,

It is a privilege for me to write this recommendation in favor of Miss Mary Marist who is a student of mine at the Computer Science Department. I have been fortunate of having her as a student already. During the time she was in my class she demonstrated interest and participated frequently, always engaged and fully present.

I have known her for almost three years and I can testify about her devotion to computer science and her leadership skills. The programming assignments she has turned in have high quality and many times they surpass my expectations. She has been dedicated to my class and has asked the right questions.

My desire is for you to consider her application as a software engineer for the following reasons:

- she is very smart
- she is cool
- bullet points are cool

Please let me know if you wish to receive more information about her, or samples of her best programming projects from my class of Software Development. Feel free to contact me for any questions you may have about her.

Thank you for your time.

Sincerely,

A stylized, handwritten signature in black ink that reads "Picasso". The signature is written in a cursive, flowing style with a long, sweeping underline.

Pablo Picasso, Ph.D.  
Assistant Professor of Computer Science  
Department of Computer Science
